

DOES YOUR ANTIHYPERTENSIVE MEASURE UP?

CHLORTHALIDONE

Measures Up Against Newer Antihypertensives

- As effective as lisinopril and amlodipine in preventing fatal CHD, nonfatal MI and all-cause mortality, the ALLHAT endpoints¹
- More effective than lisinopril in preventing stroke, heart failure, angina, and combined cardiovascular events; more effective than amlodipine in preventing heart failure¹
- More effective than beta blockers, ACE inhibitors or ARBs for black patients²

Alone or in Combination

1. A Diuretic for Initial Treatment of Hypertension? *Med Lett Drugs Ther* - 9-FEB-2009; 51(1305):9-10.
2. Drugs for Hypertension. *Treat Guidel Med Lett* - JAN-2009; 7(77):1-10.

As with all drugs, chlorthalidone may cause adverse events.
Please see complete efficacy and safety information on chlorthalidone in *The Medical Letter* newsletters.
